Ohio Educator Preparation Provider Performance Report
Mount St. Joseph University

Value-Added Data for Students Taught by Teachers Prepared by Ohio Educator Preparation Providers at Mount St. Joseph University

Reporting Period from Sept 1, 2014 to Aug 31, 2020

Description of Data:

Ohio's value-added data system provides information on student academic gains. As a vital component of Ohio's accountability system, districts and educators have access to an extensive array of diagnostic data through the Education Value-Added Assessment System (EVAAS). Schools can demonstrate through value-added data that many of their students are achieving significant progress. Student growth measures also provide students and parents with evidence of the impact of their efforts. Educators and schools further use value-added data to inform instructional practices.

Limitations of the Value-Added Data:

1. The information in the report is for those individuals receiving their licenses with effective years of 2011-2019.
2. The value-added data in this report are those reported by Ohio's Education Value-Added Assessment System (EVAAS) based on Elementary and Middle School Tests (Grades 4-8) and End-of-Course Tests for high school credit.
3. For Educator Preparation Providers with fewer than 10 linked teachers with value-added data, only the number (N) is reported. Individual EPP data files provided by ODHE through the ODE-ODHE Data Download Project, however, lowers the masked limit to 3.
4. Due to system parameters excluding records with missing demographic data, some records have not been reported.
- *5. Ohio's ordered school-building closure and subsequent emergency legislation addressing the coronavirus pandemic-related issues (House Bill 197 of the 133rd General Assembly) had substantial impacts on state testing during the 2019-2020 school year. As a result, the OTES/OPES and Value-Added sections of this report will include limited or no data.
